PATENTIn The Claims

Claims 1-24 (Cancelled)

25. (Original) A laminated structure comprising:
a body having a peripheral edge, a first side, and a second side opposite said first side;

an adhesive coating applied to said first side of the body permitting a user to attach said body to a preselected surface; and

a covering removably attached to the adhesive coating to prevent attachment of the body before the user removes the covering from the adhesive coating, said covering having a size and shape selected for covering at least a portion of the adhesive coating when attached to the adhesive coating, a release side for contacting the adhesive coating when the covering is attached to the coating, and a message side opposite said release side;

wherein said message side of the covering includes indicia directed to communicating a message to the user related to at least one of motivating the user, entertaining the user, educating the user, and inspiring the user.

26. (Previously presented) A laminated structure as set forth in claim 25 wherein said body is an absorbent body.

27. (Previously presented) A laminated structure as set forth in claim 26 wherein said message side of the covering is substantially free of messages related to using the laminated structure.

KCC 4776 (K-C 17,047)
PATENT

28. (Previously presented) A laminated structure as set forth in claim 27 wherein:

said laminated structure is a first laminated structure;
said first laminated structure is grouped with a second laminated structure; and

said first and second laminated structures are received in a container.

29. (Previously presented) A laminated structure as set forth in claim 28 wherein said second laminated structure is substantially identical to said first laminated structure.

30. (Previously presented) A laminated structure as set forth in claim 28 wherein the container includes a message related to using the laminated structure.

B1
cont.
31. (Previously presented) A laminated structure as set forth in claim 30 wherein the message related to using the laminated structure is printed on an exterior of the container.

32. (Previously presented) A laminated structure as set forth in claim 26 wherein said message side of the covering is substantially free of messages related to designating a source of the laminated structure.

33. (Previously presented) A laminated structure as set forth in claim 32 wherein:

said laminated structure is a first laminated structure;
said first laminated structure is grouped with a second laminated structure; and

PATENT

said first and second laminated structures are received in a container.

34. (Previously presented) A laminated structure as set forth in claim 33 wherein said second laminated structure is substantially identical to said first laminated structure.

35. (Previously presented) A laminated structure as set forth in claim 33 wherein the container includes a message related to using the laminated structure.

B1
cont
36. (Previously presented) A laminated structure as set forth in claim 34 wherein the message related to using the laminated structure is printed on an exterior of the container.

37. (Previously presented) A laminated structure as set forth in claim 26 wherein the laminated structure is a feminine napkin.

38. (New) A feminine care product comprising:
an absorbent body for adsorbing body fluids discharged during menstruation, the absorbent body having a peripheral edge, a first side, and a second side opposite said first side;
an adhesive coating applied to said first side of the body permitting a user to attach said body to a preselected surface;
and

B2
a covering removably attached to the adhesive coating to prevent attachment of the body before the user removes the covering from the adhesive coating, said covering having a size and shape selected for covering at least a portion of the adhesive coating when attached to the adhesive coating, a release

PATENT

side for contacting the adhesive coating when the covering is attached to the coating, and a message side opposite said release side;

wherein said message side of the covering includes indicia directed to communicating a message to the user related to at least one of motivating the user, entertaining the user, educating the user, and inspiring the user.

39. (New) A feminine care product as set forth in claim 38 wherein said message side of the covering is substantially free of messages related to using the feminine care product.

40. (New) A feminine care product as set forth in claim 39 wherein:

said feminine care product is a first feminine care product;
said first feminine care product is grouped with a second feminine care product; and

said first and second feminine care products are received in a container.

41. (New) A feminine care product as set forth in claim 40 wherein said second feminine care product is substantially identical to said first feminine care product.

42. (New) A feminine care product as set forth in claim 40 wherein the container includes a message related to using the feminine care product.

43. (New) A feminine care product as set forth in claim 42 wherein the message related to using the feminine care product is printed on an exterior of the container.

KCC 4776 (K-C 17,047)
PATENT

44. (New) A feminine care product as set forth in claim 38 wherein said message side of the covering is substantially free of messages related to designating a source of the feminine care product.

45. (New) A feminine care product as set forth in claim 44 wherein:
said feminine care product is a first feminine care product;
said first feminine care product is grouped with a second feminine care product; and
said first and second feminine care products are received in a container.

46. (New) A feminine care product as set forth in claim 45 wherein said second feminine care product is substantially identical to said first feminine care product.

B2
cont.
47. (New) A feminine care product as set forth in claim 45 wherein the container includes a message related to using the feminine care product.

48. (New) A feminine care product as set forth in claim 46 wherein the message related to using the feminine care product is printed on an exterior of the container.

49. (New) A feminine care product as set forth in claim 38 wherein the absorbent body is a feminine napkin.

50. (New) A feminine care product as set forth in claim 38 wherein the indicia is directed to communicating a message to the
